

PYTHON PROGRAMMING

CSA0817 • Programming Lab Record

STUDENT DETAILS

Name ARJUN A B

Register No. 1911260006

Slot A

PROGRAMS INCLUDED

01 Add Two Numbers	06 Find Area of Triangle
02 Calculate Area of Square	07 Calculate Simple Interest
03 Calculate Area of Rectangle	08 Convert Fahrenheit to Celsius
04 Calculate Perimeter of Rectangle	09 Convert Celsius to Fahrenheit
05 Find Area of Circle	10 Find Average of 3 Numbers

PROGRAM 1

Write a Python Program to Add Two Numbers

The screenshot shows the SIMATS Online Programming Lab interface. The top header includes the SIMATS ENGINEERING logo, the title "SIMATS Online Programming Lab", and the subtitle "PYTHON PROGRAMMING". A user profile for "Arjun A B" is visible in the top right. The interface is divided into several sections:

- QUESTIONS:** 9 / 10 completed. A dropdown menu shows "str to int". Below it, the title "STR TO INT" is followed by the instruction: "Write a Python program to convert a string to an integer."
- PROGRAM EDITOR:** A text area containing the following Python code:

```
1 a=int(input())
2 b=int(input())
3 c=a+b
4 print(c)
```

Buttons for "Run" and "Save" are located to the right of the editor.
- INPUT:** A text area containing the values "10" and "20" on separate lines.
- OUTPUT:** A text area displaying the result "30".

PROGRAM 2

Write a Python Program to Calculate Area of Square

The screenshot shows the SIMATS Online Programming Lab interface for a second program. The top header is identical to the first screenshot. The interface sections are:

- QUESTIONS:** 1 / 10 completed. A dropdown menu shows "str to int". Below it, the title "STR TO INT" is followed by the instruction: "Write a Python program to convert a string to an integer."
- PROGRAM EDITOR:** A text area containing the following Python code:

```
1 side=int(input())
2 area=side*side
3 print(area)
```

Buttons for "Run" and "Save" are located to the right of the editor.
- INPUT:** A text area containing the value "8".
- OUTPUT:** A text area displaying the result "64".

PROGRAM 3

Write a Python Program to Calculate Area of a Rectangle

The screenshot shows the SIMATS Online Programming Lab interface. The header includes the SIMATS ENGINEERING logo, the title "SIMATS Online Programming Lab", and the user "Arjun A B" with ID "1911260006A". The main area is divided into three sections: "QUESTIONS" (1/10 completed), "PROGRAM EDITOR", and "INPUT". The "QUESTIONS" section contains a dropdown menu set to "str to int" and a description: "Write a Python program to convert a string to an integer." The "PROGRAM EDITOR" section shows a Python code editor with the following code:

```
1 l=int(input())
2 b=int(input())
3 area=l*b
4 print(area)
```

The "INPUT" section shows the user has entered "70" and "80". The "OUTPUT" section shows the result "5600".

PROGRAM 4

Write a Python Program to Calculate Perimeter of Rectangle

The screenshot shows the SIMATS Online Programming Lab interface. The header includes the SIMATS ENGINEERING logo, the title "SIMATS Online Programming Lab", and the user "Arjun A B" with ID "1911260006A". The main area is divided into three sections: "QUESTIONS" (1/10 completed), "PROGRAM EDITOR", and "INPUT". The "QUESTIONS" section contains a dropdown menu set to "str to int" and a description: "Write a Python program to convert a string to an integer." The "PROGRAM EDITOR" section shows a Python code editor with the following code:

```
1 l=int(input())
2 b=int(input())
3 area=2*(l+b)
4 print(area)
```

The "INPUT" section shows the user has entered "6" and "5". The "OUTPUT" section shows the result "22".

PROGRAM 5

Write a Python Program to Find the Area of the Circle

The screenshot shows the SIMATS Online Programming Lab interface. The header includes the SIMATS ENGINEERING logo, the title "SIMATS Online Programming Lab", and the user "Arjun A B" with ID "1912260006A". The main area is divided into three sections: "QUESTIONS" (1/10 completed), "PROGRAM EDITOR", and "INPUT". The "QUESTIONS" section shows a dropdown menu with "str to int" selected and a description: "Write a Python program to convert a string to an integer." The "PROGRAM EDITOR" section shows a Python code editor with the following code:

```
1 import math
2 r=int(input())
3 area=math.pi *(r**2)
4 print(area)
```

The "INPUT" section shows the value "6". The "OUTPUT" section shows the result "113.09733552923255".

PROGRAM 6

Write a Python Program to Find the Area of a Triangle

The screenshot shows the SIMATS Online Programming Lab interface. The header includes the SIMATS ENGINEERING logo, the title "SIMATS Online Programming Lab", and the user "Arjun A B" with ID "1912260006A". The main area is divided into three sections: "QUESTIONS" (1/10 completed), "PROGRAM EDITOR", and "INPUT". The "QUESTIONS" section shows a dropdown menu with "str to int" selected and a description: "Write a Python program to convert a string to an integer." The "PROGRAM EDITOR" section shows a Python code editor with the following code:

```
1 h=int(input())
2 b=int(input())
3 area=0.5*h*b
4 print(area)
```

The "INPUT" section shows the values "5" and "5". The "OUTPUT" section shows the result "12.5".

PROGRAM 7

Write a Program to Calculate Simple Interest

The screenshot shows the SIMATS Online Programming Lab interface. The header includes the SIMATS ENGINEERING logo, the title "SIMATS Online Programming Lab", and the user "Arjun A B" with ID "19112160006A". The main area is divided into three sections: QUESTIONS, PROGRAM EDITOR, and INPUT. The QUESTIONS section shows a dropdown menu with "str to int" selected and a description: "Write a Python program to convert a string to an integer." The PROGRAM EDITOR section shows a Python code editor with the following code:

```
1 p=int(input())
2 r=int(input())
3 t=int(input())
4 SI=(p*r*t)/100
5 print(SI)
```

The INPUT section shows the input values: 1000, 5, and 3. The OUTPUT section shows the result: 150.0.

PROGRAM 8

Write a Python Program to Convert Fahrenheit to Celsius

The screenshot shows the SIMATS Online Programming Lab interface. The header includes the SIMATS ENGINEERING logo, the title "SIMATS Online Programming Lab", and the user "Arjun A B" with ID "19112160006A". The main area is divided into three sections: QUESTIONS, PROGRAM EDITOR, and INPUT. The QUESTIONS section shows a dropdown menu with "str to int" selected and a description: "Write a Python program to convert a string to an integer." The PROGRAM EDITOR section shows a Python code editor with the following code:

```
1 fahrenheit=int(input())
2 celsius=(fahrenheit-32)*5/9
3 print(celsius)
```

The INPUT section shows the input value: 98. The OUTPUT section shows the result: 36.666666666666664.

PROGRAM 9

Write a Python Program to Convert Celsius to Fahrenheit

The screenshot shows the SIMATS Online Programming Lab interface. The header includes the SIMATS Engineering logo, the lab name, and the user's name (Arjun A B). The main area is divided into three sections: Questions, Program Editor, and Input/Output.

QUESTIONS 1/10 completed

str to int

STR TO INT

Write a Python program to convert a string to an integer.

PROGRAM EDITOR Python Run Save

```
1 celsius=int(input())
2 fahrenheit=(celsius*9/5)+32
3 print(fahrenheit)
```

INPUT

32

OUTPUT

89.6

PROGRAM 10

Write a Python Program to Find Average of 3 Numbers

The screenshot shows the SIMATS Online Programming Lab interface. The header includes the SIMATS Engineering logo, the lab name, and the user's name (Arjun A B). The main area is divided into three sections: Questions, Program Editor, and Input/Output.

QUESTIONS 1/10 completed

str to int

STR TO INT

Write a Python program to convert a string to an integer.

PROGRAM EDITOR Python Run Save

```
1 a=int(input())
2 b=int(input())
3 c=int(input())
4 avg=(a+b+c)/3
5 print(avg)
```

INPUT

5
7
8

OUTPUT

6.666666666666667
